Prekės kodas: 1.207-780.99

**Prekės galimos pakuotės ar tipai:**

Modelis: Nerūdijančio plieno

Diametras: minimalus vidinis 40 mm; maksimalus išorinis 110 mm

## **Prekės aprašymas:**

This kit is perfect for those wanting to fill glass jars with oil, brine, spirits or other liquids to preserve food. With the Jar Kit in combination with the Enolmatic Filling machine you can preserve your homemade products such as dried tomatoes or peppers in brine or oil: the options are endless.

Once the maximum fill-level is set, the machine fills each jar equally until the set limit is reached. The process is realized within a few seconds, without wasting a single drop of liquid.

Fast filling, no-drop system. Made in food-grade materials.

Made of stainless steel, this kit can be used to bottle alcohol products or products with a hot-fill process.

The Jar Kit is available separate from the Enolmatic filling machine. We offer different kind of kits to adapt the filling machine to your needs.
