Prekės galimos pakuotės ar tipai:

Kita info: Įpylimo angos dydis 400x400mm

Tipas:: neiloniniai dantračiai, 220mm ilgio

Prekės aprašymas:

Grape crusher for small grape is characterized by stainless steel hopper and screw, and varnished steel frame. This is the smallest grape crusher in all Grifo's production.

It's a machine easy to use and handy, thanks to its high-quality materials and attention to details. Underneath the hopper there's a steel varnished support; the rotation is allowed by a handwheel which sends input movement to the rollers and press the grapes. Gears are in nylon as well to ensure a long life and a better and safe treatment to the food. Rollers are adjustable thanks to special supports.
